

Growing body confidence

Can you label these body parts for most boys?

Penis

Scrotum

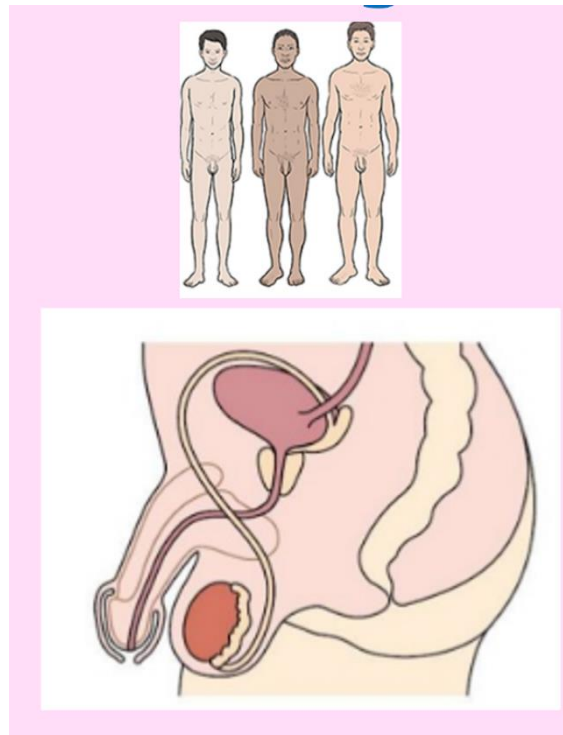

Testicles

Bladder

Sperm tubes

Urethra

Foreskin

Can you match these body parts for most boys to the correct definition?

Penis	The tube that semen (liquid with sperm) travels from the testicles to the urethra.
Scrotum	The external genital organ (bit you can see) where urine (wee) and sperm in semen come out of the body.
Testicles	The pouch of skin that holds the testicles.
Bladder	The organ where urine (wee) is stored.
Sperm tubes	The fold of skin that that covers the head of the penis.
Urethra	The tube which carries urine (wee) from the bladder to the outside of the body.
Foreskin	These hang behind the penis in the scrotum. They produce and store sperm.

Urethra ✓	The tube which carries urine (wee) from the bladder to the outside of the body.
Foreskin	These hang behind the penis in the scrotum. They produce and store sperm. testicles

Growing body confidence

Can you label these parts of the vulva (between most girls' legs) for most girls?

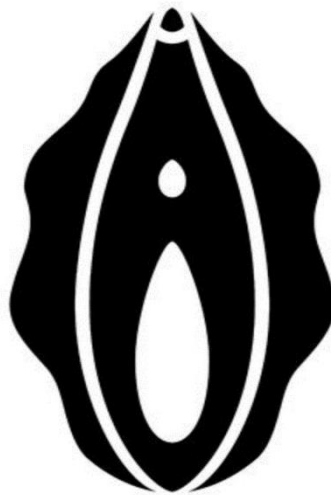

Urethra

Clitoris

Vaginal opening

Outer labia

Inner labia

Can you match these body parts for most girls to the correct definition?

Vagina	The tube which carries urine (wee) from the bladder to the outside of the body.
Vulva	The external genital organ (bit you can see) – often called the vagina by mistake. It includes: the vagina, labia and clitoris.
Outer labia	The muscular tube that connects the uterus (womb) to the outside world. It is where menstrual blood comes out (not wee or urine).
Inner labia	This is a small pea -sized bump at the top of the labia. It is very sensitive to touch.
Urethra	The inside lips of the vulva, which do not have pubic hair.
Clitoris	The outside lips of the vulva, which after puberty are covered with pubic hair.
