ZONES OF REGULATION:

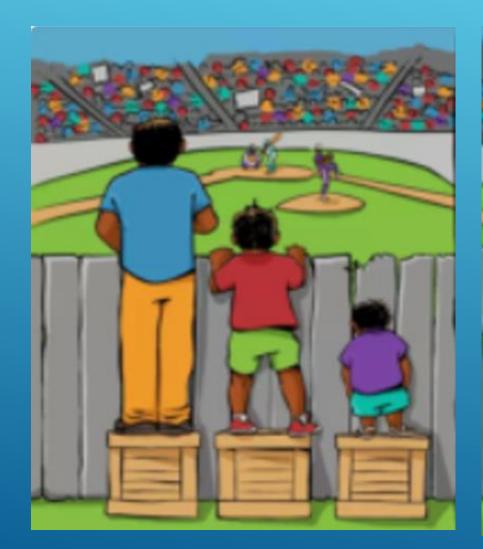

Time To Talk

24th November' 21

A THERAPEUTIC APPROACH TO BEHAVIOUR

Don't confuse consistency with equality. Go back to our iceberg our children have had different life experiences. Consistency is about giving the same message but how you do it maybe different.

You give the children what they need and these needs will be different.

Discipline is helping a child to solve a problem.

Punishment is making a child suffer retribution for having a problem.

To raise problem solvers focus on solutions, not retributions.

LR Knost.

You can't teach children to behave by making them feel worse. When children feel better they behave better.

Pam Leo

FLIP YOUR LID: FIGHT, FLIGHT, FREEZE.

'Life is 10% what happens to us and 90% how we react to it'

Charles Swindoll

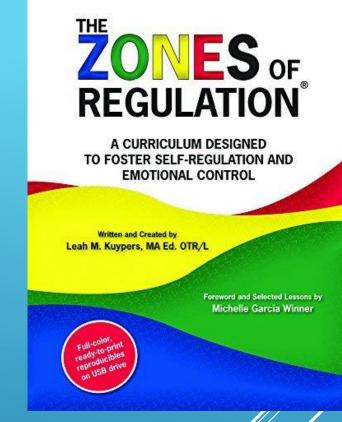

ZONES of regulation.

A system devised to teach self-regulation and emotional control.

Strategies to help regulate emotions and to move between zones.

To read facial expressions

To identify their triggers.

DEFINITION OF SELF-REGULATION:

"...it is defined as the capacity to manage one's thoughts, feelings and actions in adaptive and flexible ways across a range of contexts."

Jude Nicholas

It encompasses:

- •Self-control
- Resilience
- Self-management
- Anger management
- Impulse control
- Sensory regulation

Why is self-regulation important?

- •Research has found that higher academic achievement is more likely when interventions include self-regulation components.
- •Typically, children who can self-regulate will turn **into teens who** can self-regulate.

ZONES of Regulation

THERE ARE FOUR ZONES:

We will experience all the zones as some point.

All zones are okay!

All feelings are okay!

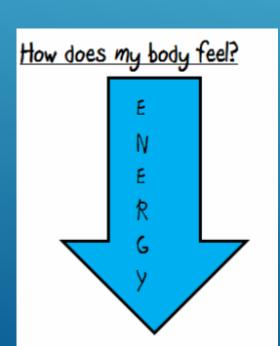

The Blue Zone

We are expected to be in the Blue Zone just before bed time or when we are watching the TV or when something has happened to make us sad.

We are running slow! We might be tired or sad This is an unexpected

zone to be in for learning.

HOWDOIFE1?

Sleepy

Bored

Bue zone feelings

Tearful

Sick

Lonely

Tired

THE GREEN ZONE....THE LEARNING ZONE!! WE ARE EXPECTED TO BE IN THE GREEN ZONE WHILE WE ARE LEARNING. IT IS WHEN OUR BRAINS AND BODIES ARE RELAXED AND FOCUSSED!

How does my body feel?

My energy level is "just right"

I am calm, focused and ready to learn!

Howdo I feel?

Нарру

Ready for learning

Green Zone feelings

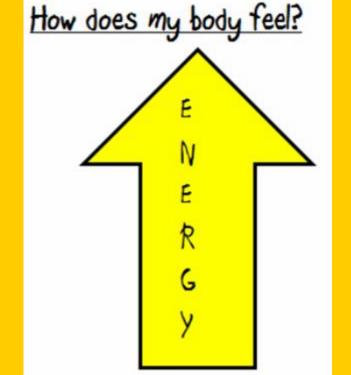

Focussed

Calm

The Zone.....during play time, lunch time and even at the end of the day, it's expected for us to be in the ZONE!!

Embarrassed

Nervous

Excited

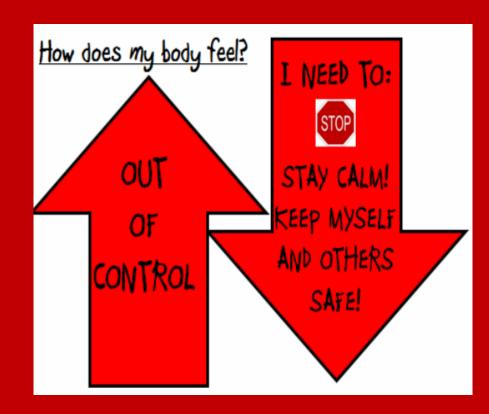

Jealous

Confused

The Red Zone.... We must keep ourselves and others safe!

Angry

Terrified

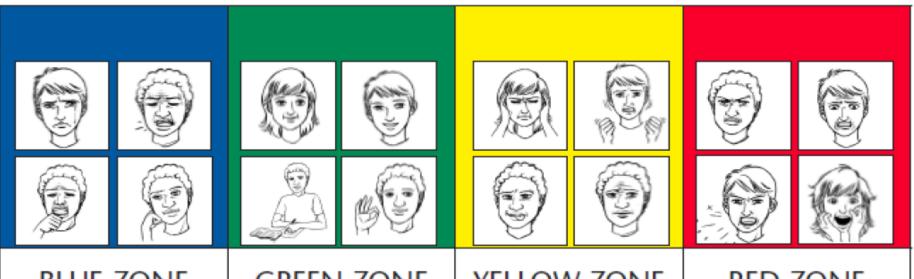

Aggressive

Out of control

The **ZONES** of Regulation®

What zones have you been in ove the day?

BLUE ZONE

Sad Sick Tired Bored Moving Slowly

GREEN ZONE

Happy
Calm
Feeling Okay
Focused
Ready to Learn

YELLOW ZONE

Frustrated
Worried
Silly/Wiggly
Excited
Loss of Some Control

RED ZONE

Mad/Angry
Terrified
Yelling/Hitting
Elated
Out of Control

It is okay to be in all of these zones but we need to recognise what it feels like and we need to have the tools to allow to move into the green zone.

How can you help yourself?

The BLUE zone

How might you feel?

sad tired bored moving slowly

What might help you?

Talk to someone
Stretch
Take a brain break
Stand
Take a walk
Close my eyes

The GREEN zone

How might you feel?

happy okay focussed ready to learn

What might help you?

The goal of this
exercise is to get to
the GREEN zone.
What can you do to
be happy, calm and
ready to learn?

The YELLOW zone

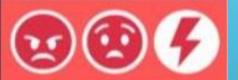

How might you feel?

nervous confused silly not ready to learn

What might help you?

Talk to someone
Count to 20
Take deep breaths
Squeeze something
Draw a picture
Take a brain break

The RED zone

How might you feel?

frustrated scared out of control

What might help you?

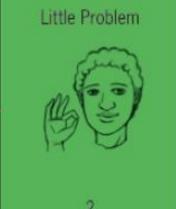

Stop what I'm doing
Make sensible choices
Take deep breaths
Ask for a break
Find a safe space
Ask for help

Size of the Problem

Remember the size of your reaction has to match the size of the problem!

How big do others see the problem?

How big should your reaction be?

Medium Problem

Problem

Huge Problem

Emotion Coaching in Practice

- Stage 1: Recognise the child's feelings and empathise 'Connect before correct' (Golding, 2015)
- ► Adult: 'Your fists are clenched and you're breathing very hard, it looks to me like you are feeling angry am I right?'

 Child A's response: 'Yes, they hit me in the face with the ball and won't let me play'.
- Stage 2: Validate and label child's feelings
- Adult: 'I can see how being left out of a game can make you feel sad and lonely, and being hit in the face with a ball hurts' Child A's response: nodded in agreement.
- ► Stage 3: Limit-setting
- Adult: 'It's not okay to kick the shelf, because it could frighten the other children'
 Child A gradually calmed when listened to, stopped kicking, engaged in a shared story that appealed.
- Stage 4: Problem-solving
- Once Child A was calm and receptive, together we explored alternative ways he could express and manage his feelings (e.g. using his 'helping hand', finger breathing, scaling his emotions)

Negative Phrasing:

Stop being silly

Be good

Stop throwing that

Stop running

Don't talk to me like that.

Come back here Now.

Get down from there.

Positive Phrasing:

Stand next to me

Stay in your bed to sleep.

Let's go and read at bedtime story.

Let's talk in our quiet voice.

Let's talk about it calmly.

Walk with me to the park.

Let's use our words to explain how we feel.

Limited Choices.

Where shall we talk? Here or in the kitchen.

Put the pen on the table or in the box?

Are you going to sit on your own or with the group?

Are you going to do your work now or at break time?

Are you starting your work with words or a picture?

For children who like to be in control this allows them still to have some control.
